

Mina Morcos Mina

Back-End .NET Web Developer

Contact Via Email | Contact Via Phone | BioLink | LinkedIn Profile | GitHub Profile

Brief Summary

Motivated back-end Developer with hands-on experience in .NET Core, APIs, Razor Pages, and SQL Server. Having experience building scalable web applications and managing databases to streamline operations. Passionate about crafting innovative solutions, enhancing user experience, and exploring the intersection of software development and UI/UX design. Seeking to contribute to impactful projects and grow within a dynamic development environment.

Education

Alexandria University, Bachelor of Science, Software Industry & Multimedia Oct 2022 – June 2026

- GPA: 3.29/4.0 (Very Good B+) (**Excel College Track**)
- **Coursework:** Operating systems, Algorithms, Database Development, Web Development, Cloud Computing, Mobile Application Development, Game Development, AI for Games, Software Theories, Information Security, AI & Data Science, Systems Simulation, Advanced Multimedia Systems, Computational Theory, and Mathematics.

Experience

Full Stack Developer Intern, Digital Egypt Pioneers Initiative (DEPI) [Achievements](#) Oct 2024 – May 2025

- Aims to become a versatile software engineer, focusing on data-driven applications using .NET technologies.
- Strong back-end skills in C# and front-end proficiency in HTML5, JavaScript, and CSS3.
- Hands-on experience with .NET Core Web API and MVC for scalable web services and applications.
- Program includes 4 months of technical training (180 hours) and 2 months of professional freelancing skills.
- Collaborated with the team to implement project solutions, enhancing both technical and teamwork abilities.

Software Engineer Intern, Bibliotheca Alexandrina [Certificates](#) Aug 2024 – Sept 2024

- Extended training from August to September due to strong performance and dedication.
- Gained practical experience in .NET Core framework and Razor Pages, building simple yet functional projects.
- Developed hands-on skills in database server management, learning to design and manage databases efficiently.
- Collaborated with the team to implement project solutions, enhancing both technical and teamwork abilities.

ECPC Contestant, ICPC [Show Profile](#) [Show Photos](#) July 2024

- Gained problem-solving and algorithmic skills.
- Achieved a team rank of 99th in the competition.

Robotics Trainer Volunteer, Private Initiated Program June 2024 – Aug 2024

- Robotics was taught using LEGO Spike and introduced the kids to basic programming concepts, fostering creativity and technical skills.

Software Engineer Intern, ALX Africa July 2023 – Sept 2023

- Gained knowledge in C Language, Shell Navigation, Emacs, Git, and Vi.
- Completed courses on soft skills, including time management, problem-solving, critical thinking, and work ethics.

Skills

Soft Skills:

- Teamwork, Management, communication & organizational skills.
- Creativity & attention to details.
- Strong problem-solving skills with a logical and analytical approach to challenges.

Programming Languages:

- C#, Java, C++ , SQL, C, Python, Dart, HTML, CSS, and JavaScript

Technologies:

- .NET, Microsoft SQL Server, Oracle Database XE, MongoDBCompass, Tableau, Figma, and Unity

Projects

ProGrow (College graduation project) [Project GitHub repo](#)

- Developed the **back-end** of ProGrow, a career networking platform, using **.NET Web APIs** with a focus on scalable architecture and **database design**. Collaborated on **UI/UX design** and integrated **AI** features for CV analysis and career guidance.

Teta’s Kitchen Website

- Took full ownership of the **back-end development**, including setting up and managing the database (SQL Server), building APIs and business logic using ASP.NET Core MVC.

WaveAway Website [Project GitHub repo](#)

- Developed a **full-stack web application** enabling users to browse and reserve tourism tours, with role-based access control (Customer and Admin).
- Tools Used: .NET Framework Core MVC with Razor Views

University Website [Project GitHub repo](#)

- Developed a **front-end** university website for student course registration and academic advising ensuring a user-friendly interface and seamless navigation.

WaveAway UI Design [Preview in Figma](#)

- Designed the **WaveAway UI**, a tourism app for the **Red Sea, Egypt**, focusing on an intuitive and visually appealing user experience.
- Tools Used: Figma, Miro, Adobe Photoshop

Harry’s Maze Game [Gameplay Video](#)

- Designed and developed a **Harry Potter-inspired maze game** as part of a team project, creating immersive levels and gameplay mechanics.
- Tools Used: C#, Unity

RSA Cryptography Algorithm [Project GitHub repo](#)

- Implemented the RSA Cryptography Algorithm, demonstrating strong problem-solving and security skills.

Image Format Identifier [Project GitHub repo](#)

- Implemented code that detects and identifies image file formats (**JPEG, PNG, GIF, BMP, TIFF, RAW**) by analyzing their header bytes.

HandTrackMouse [Project GitHub repo](#)

- Developed **HandTrackMouse**, a vision-based system to control the mouse through hand gestures.
- Tools Used: Python, OpenCV, MediaPipe, PyAutoGUI
